

EXPERIMENT 4:

The image shows two windows from the R environment. The top window, titled "C:\Users\trish\OneDrive\Documents\exp4.R - R Editor", contains the following R code:

```
num1 = as.integer(readline(prompt = "enter the first number: "))
num2 = as.integer(readline(prompt = "enter the second number: "))
num3 = num1 / num2
print(num3)
```

The bottom window, titled "R Console", shows the output of running the script. It displays the R version (4.6.1), copyright information (© 2026 The R Foundation for Statistical Computing), and platform details (x86_64-w64-mingw32/x64). It also includes a disclaimer about warranty and information on how to cite R. The console shows the execution of the script, with the user entering the first number as 2 and the second number as 6, resulting in the output 0.3333333.

```
R version 4.6.1 (2026-06-24 ucrt) -- "Happy Hop"
Copyright (C) 2026 The R Foundation for Statistical Computing
Platform: x86_64-w64-mingw32/x64
