

EXPERIMENT 5:

The image shows two windows from the R environment. The top window, titled 'C:\Users\trish\OneDrive\Documents\exp5.R - R Editor', contains an R script that reads a number from the user and checks if it is even or odd. The bottom window, titled 'R Console', shows the output of running the script. It displays the R license notice, followed by the execution of 'source("exp4.R")' and 'source("exp5.R")'. The first script prompts for two numbers and outputs a decimal result. The second script prompts for a number and outputs 'number is even'.

```
C:\Users\trish\OneDrive\Documents\exp5.R - R Editor
num = as.integer(readline(prompt = "enter a number: "))
if ((num %% 2) == 0) {
  print("number is even")
} else {
  print("number is odd")
}
```

```
R Console

R is free software and comes with ABSOLUTELY NO WARRANTY.
You are welcome to redistribute it under certain conditions.
Type 'license()' or 'licence()' for distribution details.

Natural language support but running in an English locale

R is a collaborative project with many contributors.
Type 'contributors()' for more information and
'citation()' on how to cite R or R packages in publications.

Type 'demo()' for some demos, 'help()' for on-line help, or
'help.start()' for an HTML browser interface to help.
Type 'q()' to quit R.
