

EXPERIMENT 14:

```
R C:\Users\trish\OneDrive\Documents\exp14.R - R Editor
a <- c(55, 67, 89, 80, 90)

# Split the graphics window into 1 row, 2 columns
par(mfrow = c(1, 2))

# 1. Vertical Bar Plot
barplot(a,
        main = "Vertical Bar Plot",
        xlab = "Index",
        ylab = "Values",
        col = "skyblue")

# 2. Horizontal Bar Plot
barplot(a,
        horiz = TRUE,
        main = "Horizontal Bar Plot",
        xlab = "Values",
        ylab = "Index",
        col = "lightcoral")

# Reset layout back to single plot
par(mfrow = c(1, 1))
```
