

## EXPERIMENT 18:

```
R C:\Users\trish\OneDrive\Documents\exp18.R - R Editor
# Set seed for reproducible random values
set.seed(9)

# Generate 1000 standard normal random points
x <- rnorm(1000)
y <- rnorm(1000)

# Generate the smooth density scatter plot
smoothScatter(x, y,
               xlab = "x",
               ylab = "y")
```
